USER MANUAL

Supervisor Panel

Step-by-step guide for supervisors

Cher Services LLC • Version 1.0 • November 2026

Contents

1. **Service reports**
   Review, approve changes, sign and delete reports
2. **Employees**
   Add technicians and supervisors
3. **Schedule a job**
   Create visits and recurring maintenance
4. **Manage jobs**
   Cancel requests, reschedule, reassign, delete
5. **Create an invoice**
   Customer, work order, labor and parts
6. **Parts & Orders**
   Quotes, approvals, vendors and invoices from parts
7. **Manage invoices**
   Edit, payments, status, void and delete
8. **Customers**
   Import, add, edit, schedule and bill
9. **Inventory & Equipment**
   Stock and machine history
10. **Statistics**
    Business overview by period and technician
11. **Settings**
    Invoice numbers, tax, labor rate, backups

Getting around. The main menu is always at the top of the screen:

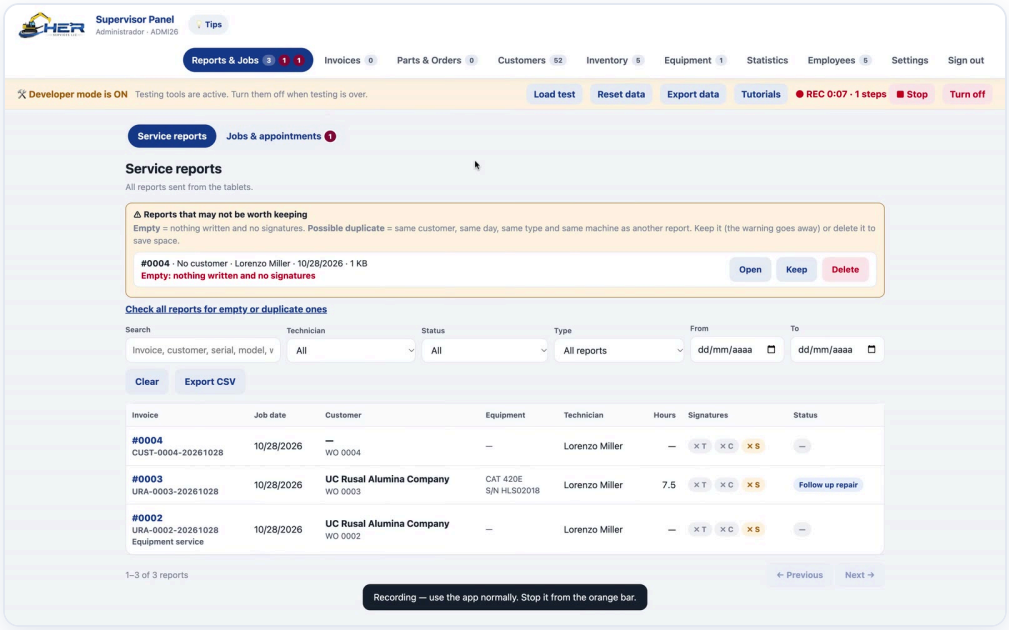

Reports & Jobs **Invoices** **Parts & Orders** **Customers** **Inventory** **Equipment** **Statistics** **Employees** **Settings**

The red numbers next to a menu item show how many things are waiting for you. Click **Tips** at any time for help. A narrated video version of this manual is also available: *Supervisor_Panel_Tutorial.mp4*.

01 Service reports

Reports & Jobs → Service reports

Every report sent from the technicians' tablets appears here, newest first.

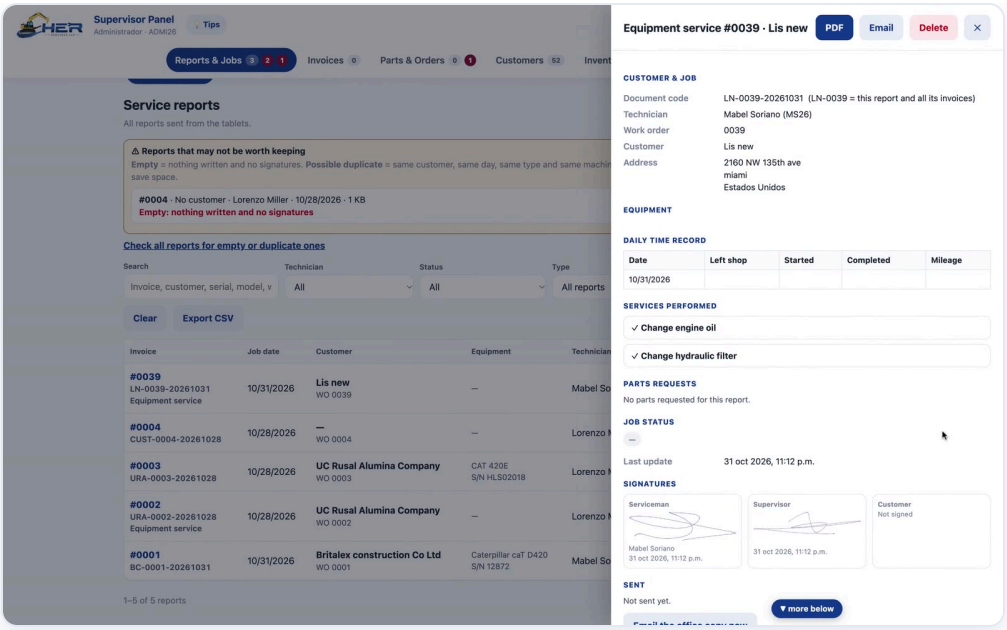

The Service reports list, with the warning box for reports that may not be worth keeping.

- The **yellow box** warns about **empty** reports (nothing written, no signatures) and **possible duplicates** (same customer, day, type and machine). Choose `Open`, `Keep` or `Delete`.
- Filter by **Search**, **Technician**, **Status**, **Type** and dates. Click `Export CSV` to download the list.

Open a report

Click a report number. The panel shows the customer and job, equipment, **daily time record**, services performed, parts requests, job status and signatures.

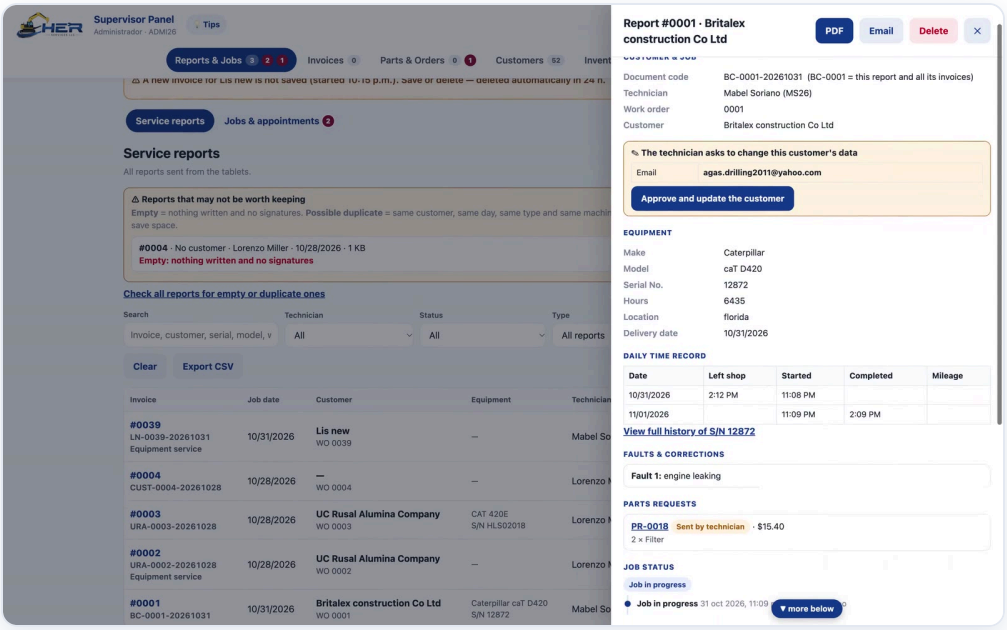

Report details. Top: PDF, Email, Delete. Bottom: Email the office copy, Create invoice from this report.

> ★ **Tip:** click **View full history of S/N…** to see all the work ever done on that machine.

Approve a customer data change

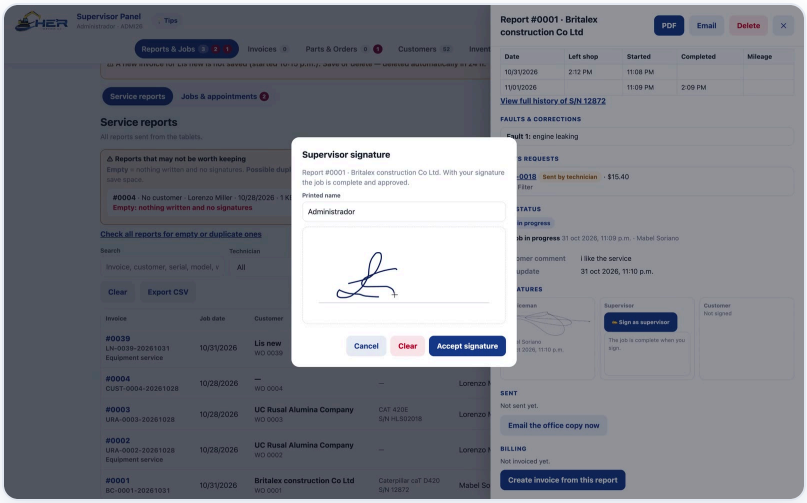

If a technician asks to change the customer's data (for example a new email), a yellow box appears at the top of the report. Review it and click **Approve and update the customer**.

A data change requested by the technician.

Sign as supervisor

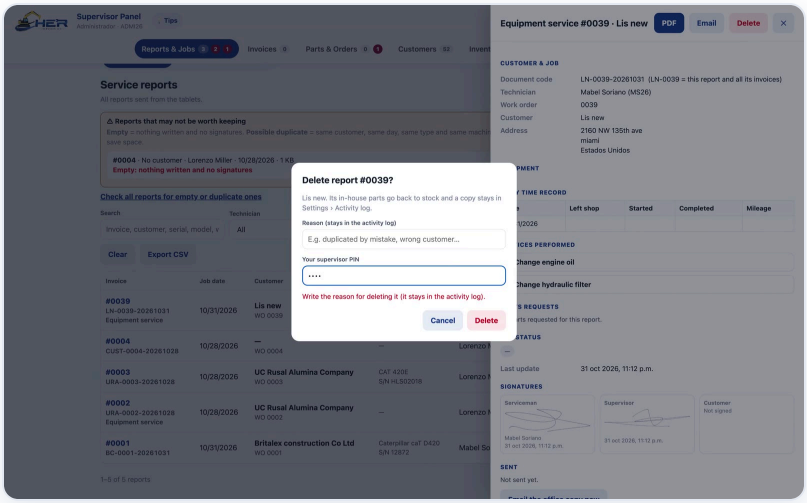

1. Scroll down to **Signatures** and click **Sign as supervisor**.
2. Sign with the mouse, a finger or a pen. Click **Clear** to start over.
3. Click **Accept signature**. The message *"Signed — the job is complete"* confirms it.

The supervisor signature pad.

Delete a report

Open the report and click **Delete**. Write the **reason** and enter your **supervisor PIN** — both are required.

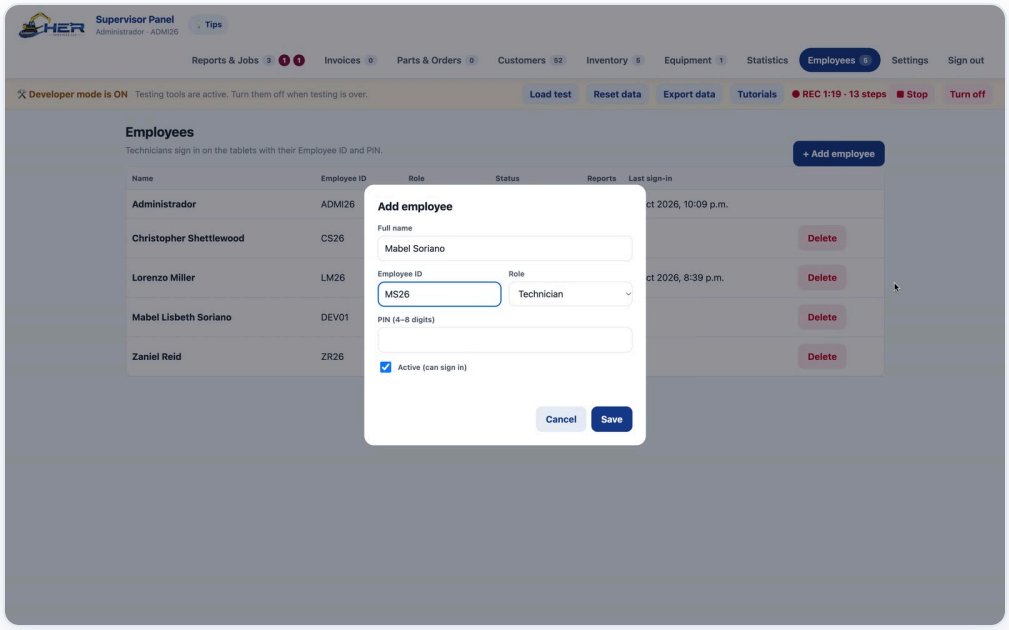

Deleting a report requires a reason and your PIN.

> **Good to know:** in-house parts go back to stock, and a copy of the deleted report stays in **Settings → Activity log**.

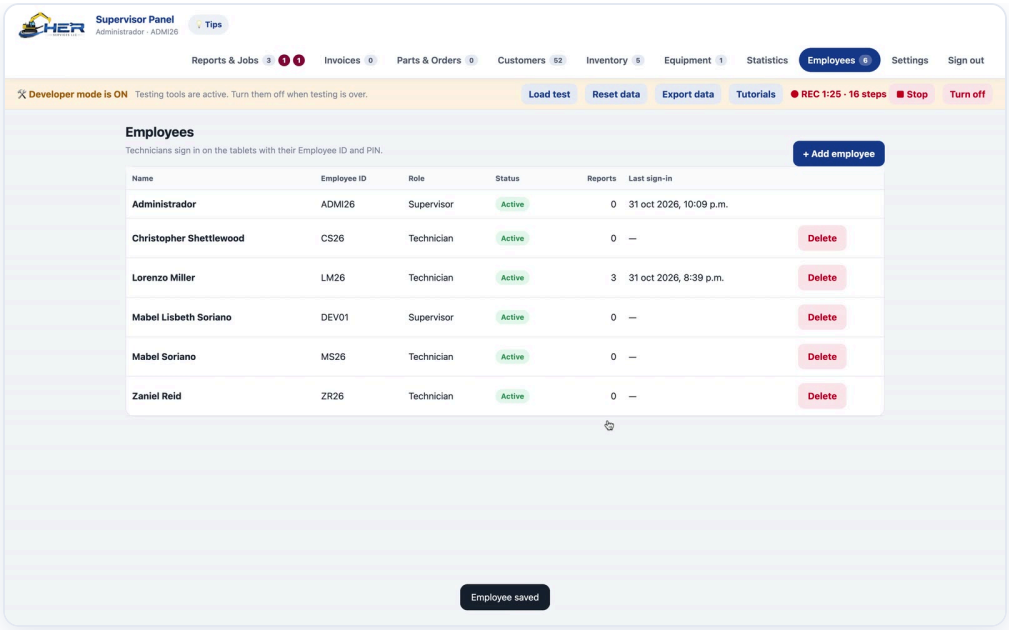

02 Employees

Employees → + Add employee

1. Type the **Full name**.
2. Enter an **Employee ID** (for example *MS26*). It is used to sign in on the tablet.
3. Choose the **Role**: *Technician* or *Supervisor*.
4. Set a **PIN** of 4 to 8 digits.
5. Leave **Active (can sign in)** checked and click **Save**.

The Add employee form.

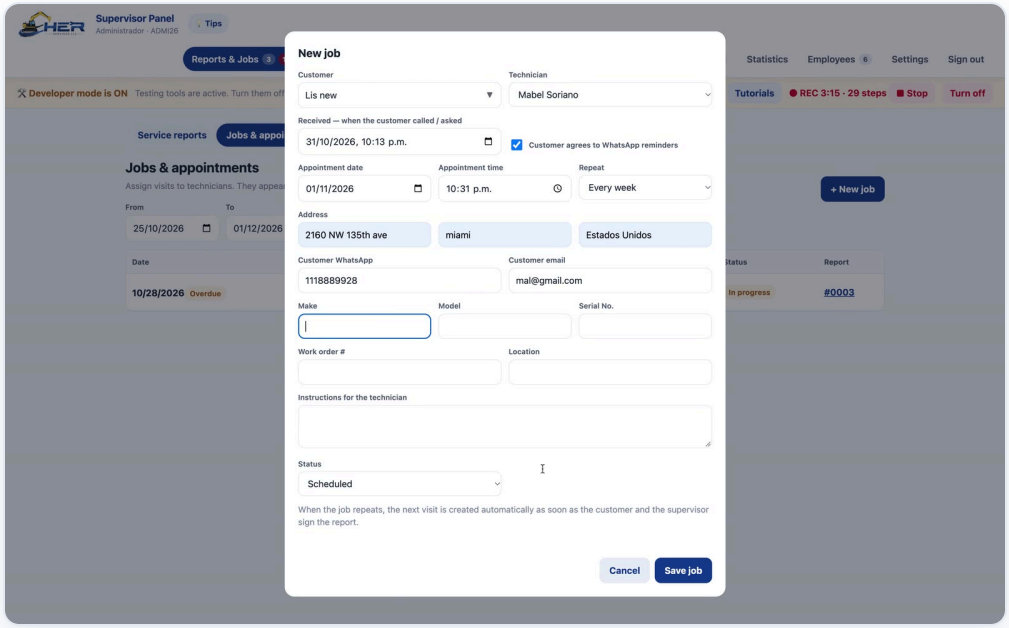

The employee list shows each person's ID, role, status, reports and last sign-in.

Tip: to remove someone's access, click **Delete** on their row, or uncheck **Active**.

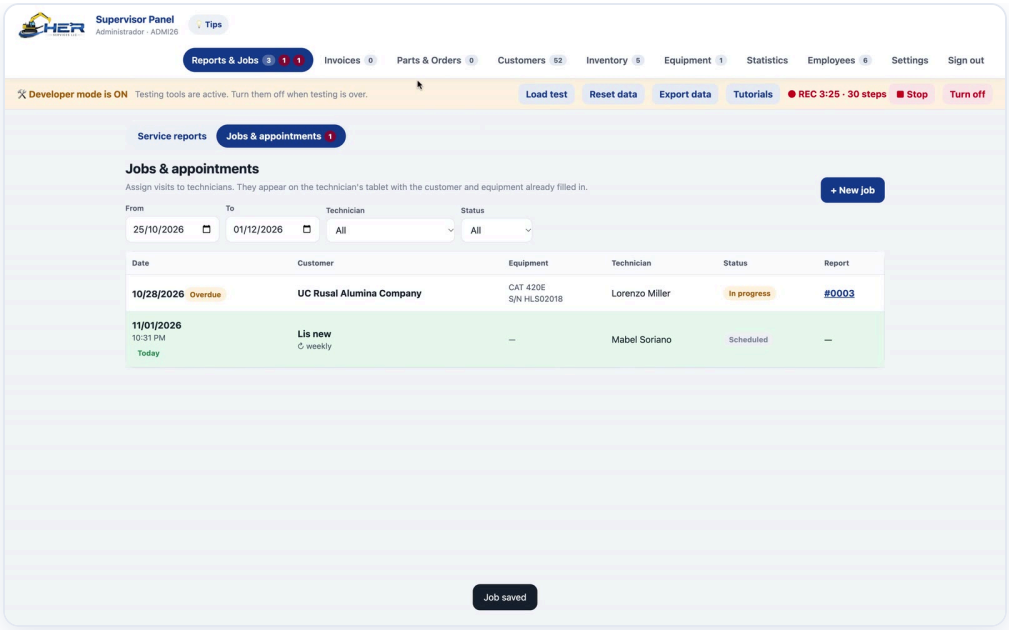

03 Schedule a job

Reports & Jobs → Jobs & appointments → + New job

1. **Customer:** pick a saved customer or type a new name.
2. **Technician:** choose who will do the visit.
3. Check **Customer agrees to WhatsApp reminders** if the customer agreed.
4. Set the **Appointment date** and **time**.
5. **Repeat:** for regular maintenance choose a frequency, e.g. *Every week*.
6. Fill in the **Address**, **Customer WhatsApp** and **email**.
7. Optional: **Make**, **Model**, **Serial No.**, **Work order #**, **Location** and **Instructions for the technician**.
8. Click **Save job**.

The New job form.

The new job in the list. It also appears on the technician's tablet with everything filled in.

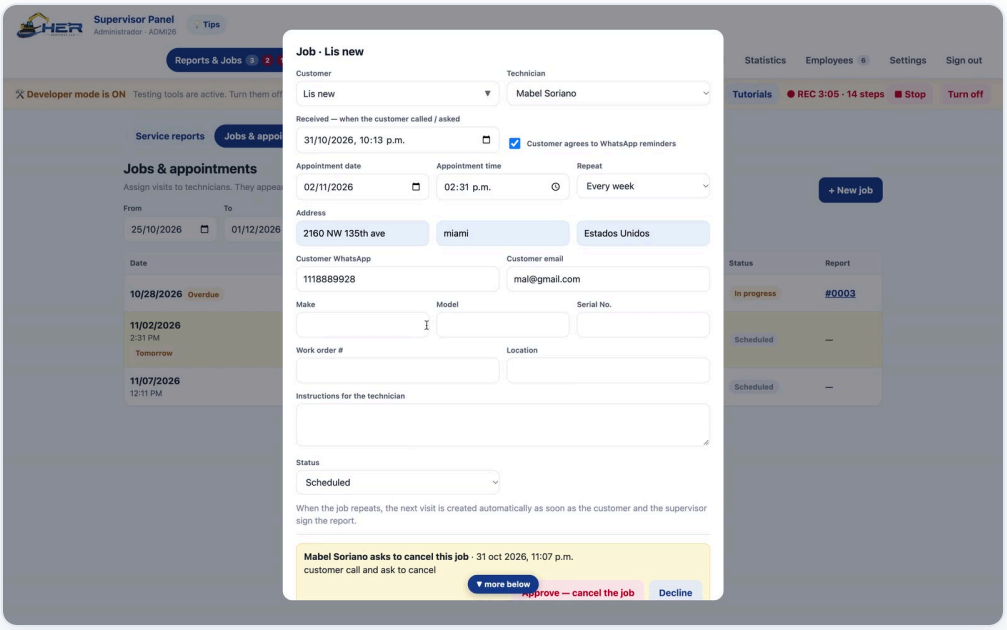

> **Recurring jobs:** the next visit is created automatically as soon as the customer and the supervisor sign the report. **Overdue** jobs are marked in orange.

04 Manage jobs

Reports & Jobs → Jobs & appointments

Cancel requests from technicians

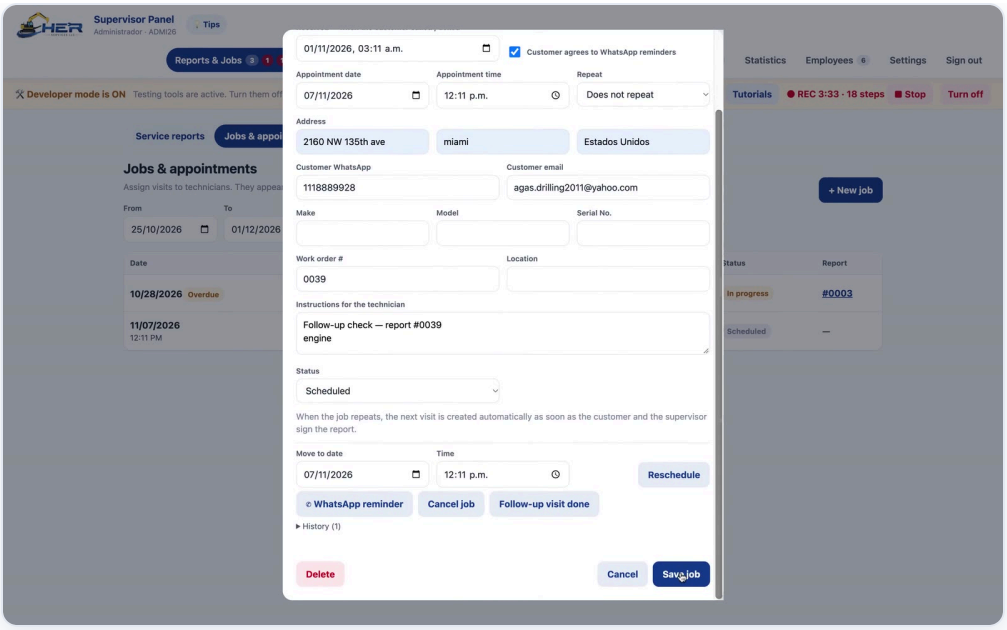

When a technician asks to cancel a job, the job is highlighted in the list. Open it and, at the bottom, click **Approve — cancel the job** or **Decline**.

A cancel request from the technician, shown at the bottom of the job.

Reschedule, reassign or delete

- **Move to date / Time** → **Reschedule** to move the visit.
- **WhatsApp reminder**, **Cancel job** and **Follow-up visit done** are at the bottom of the job.
- Change the **Technician** to give the job to someone else, then click **Save job**.
- A cancelled job can be **Reopen**ed. Click **Delete** to remove a job completely.

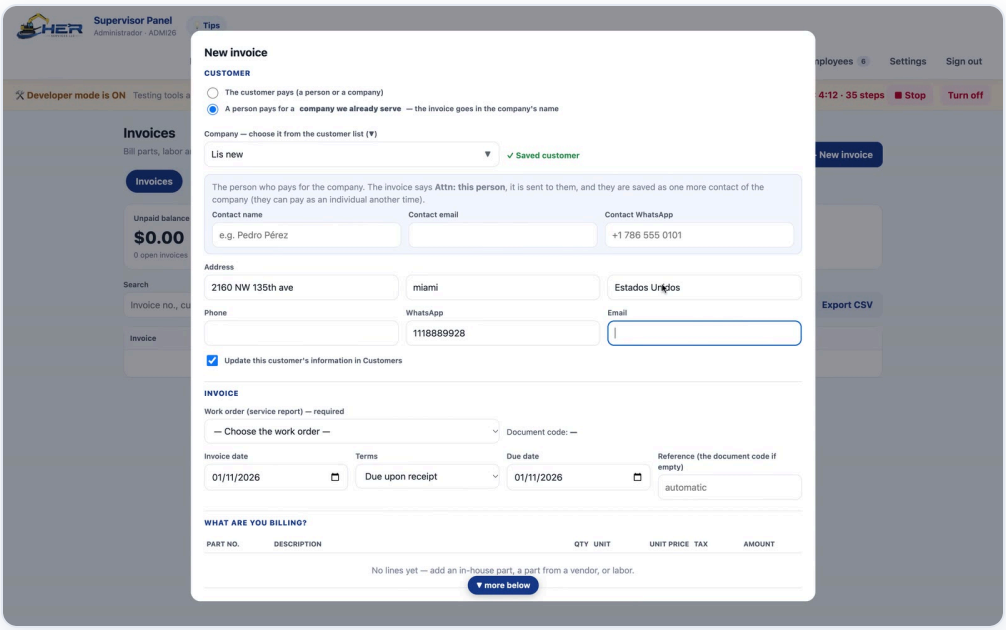

Editing a job: reschedule, reminders and status.

05 Create an invoice

Invoices → + New invoice

Customer

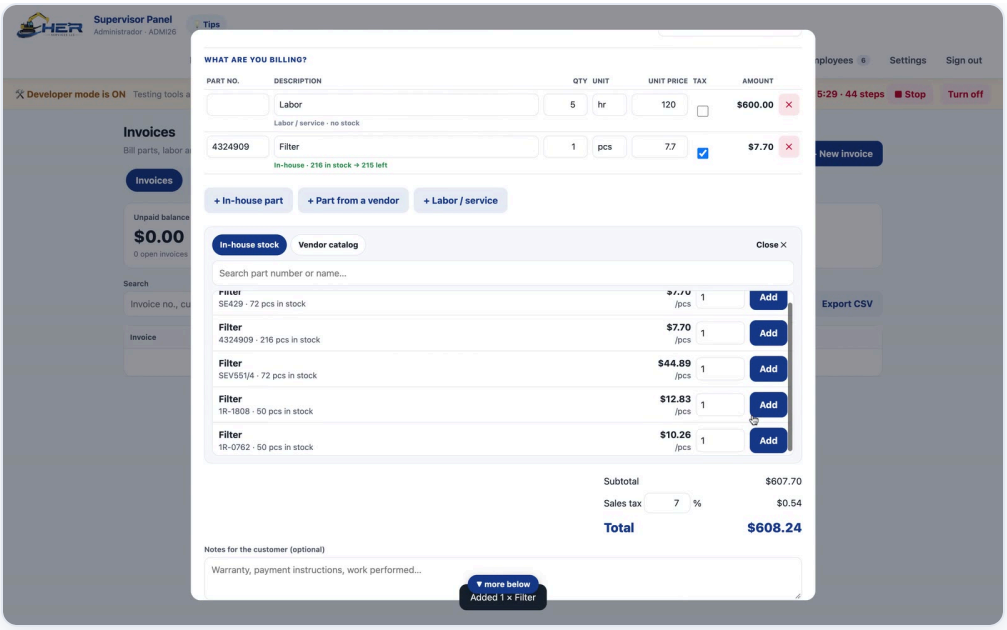

- **The customer pays** — a person or a company pays directly.
- **A person pays for a company we already serve** — the invoice goes in the company's name. Pick the company and write the **Contact name**; the invoice says *Attn: this person*.
- Address, phone and email fill in automatically. Keep **Update this customer's information in Customers** checked to save changes.

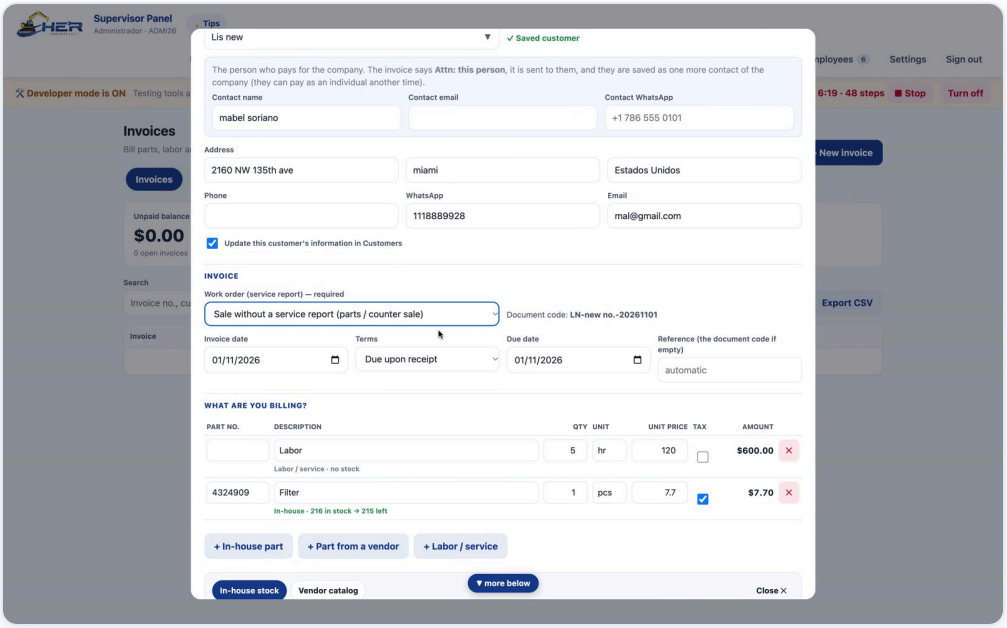

Choosing who pays.

Work order and lines

- **Work order (service report)** is required. Choose the service report from the list, or **Sale without a service report (parts / counter sale)**.
- `+ Labor / service` — enter hours (Qty) and rate (Unit price).
- `+ In-house part` — search the part and click `Add`. In-house parts come out of the inventory automatically.
- `+ Part from a vendor` — vendor parts go to **Orders**.
- Check **Tax** on taxable lines. Subtotal, sales tax and total are calculated for you.
- Optional **Notes for the customer**, then click `Save invoice`.

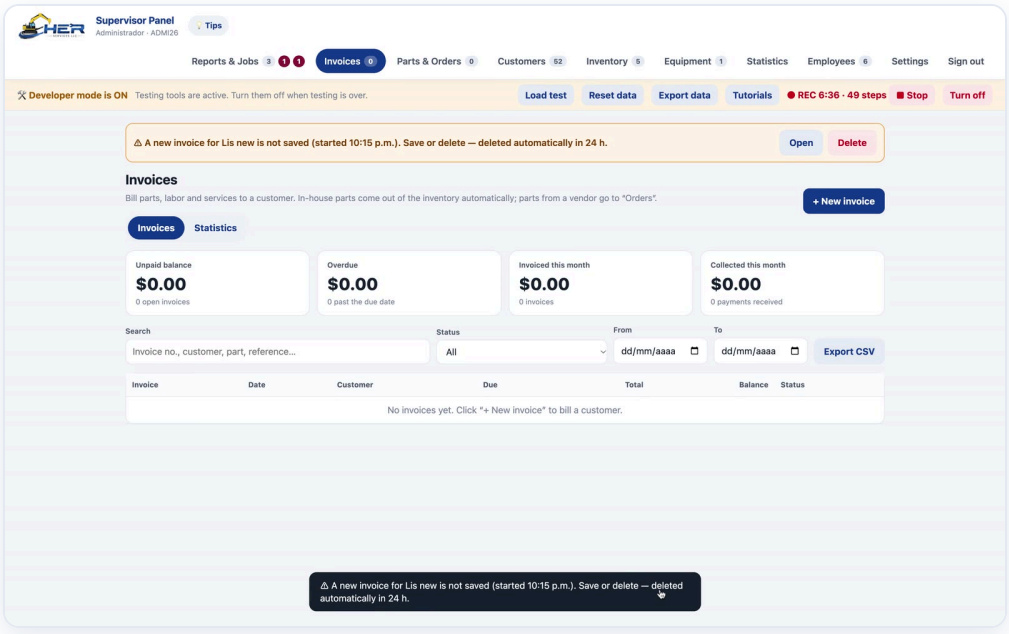

Adding labor and an in-house part.

Work order selected and lines ready to save.

> **Red messages:** if something is missing, a red message above the buttons tells you what to fix — for example the contact name or the work order.

Unsaved invoices

The yellow banner for an unsaved invoice.

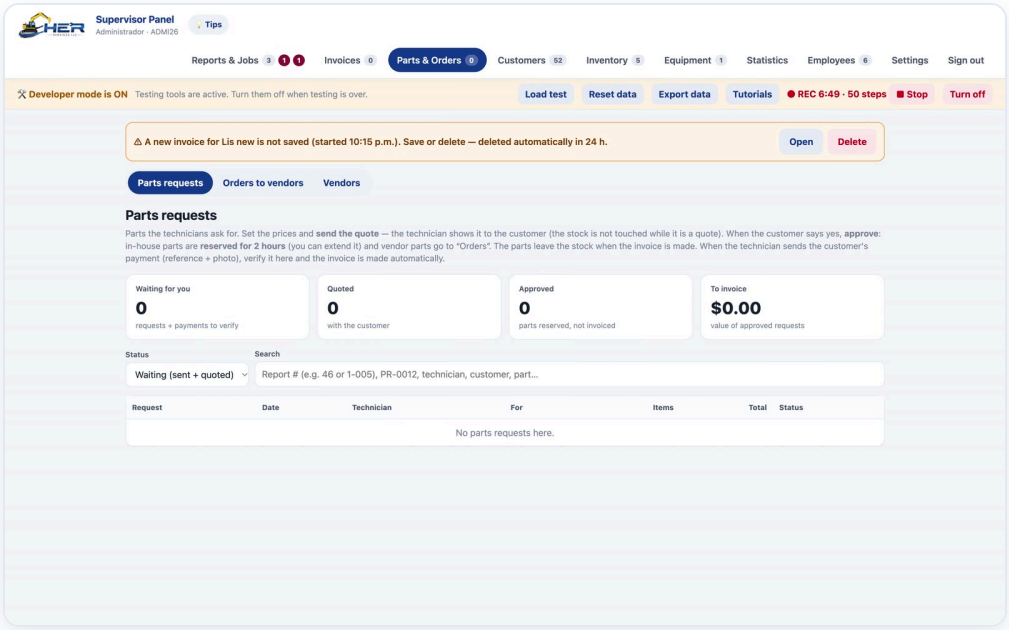

If you leave an invoice without saving, a yellow banner appears. Click **Open** to finish it or **Delete** to discard it.

> ★ **Remember:** unsaved drafts are deleted automatically after **24 hours**.

06 Parts & Orders

Parts & Orders → Parts requests · Orders to vendors · Vendors

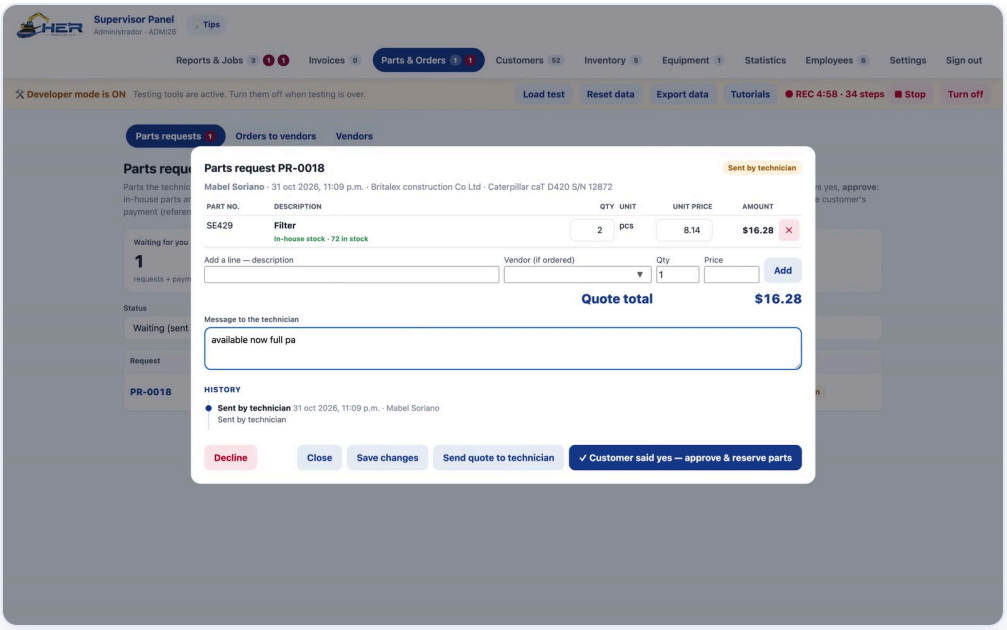

Parts requests shows the parts your technicians ask for. The cards at the top count requests waiting for you, quoted, approved and ready to invoice.

Parts requests overview.

Send a quote

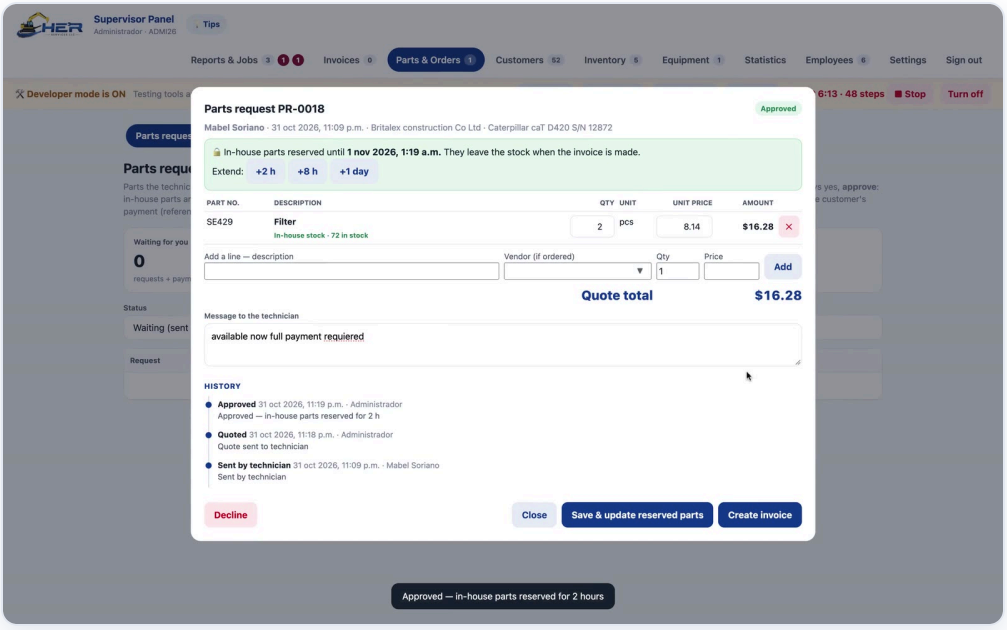

1. Click a request to open it (technician, customer, machine and parts).
2. Check the **Unit price** and change it if needed. You can add a line or choose a vendor.
3. Write a **Message to the technician**, e.g. *"available now, full payment required"*.
4. Click **Send quote to technician**. The technician shows it to the customer.

A parts request ready to be quoted.

Approve and reserve

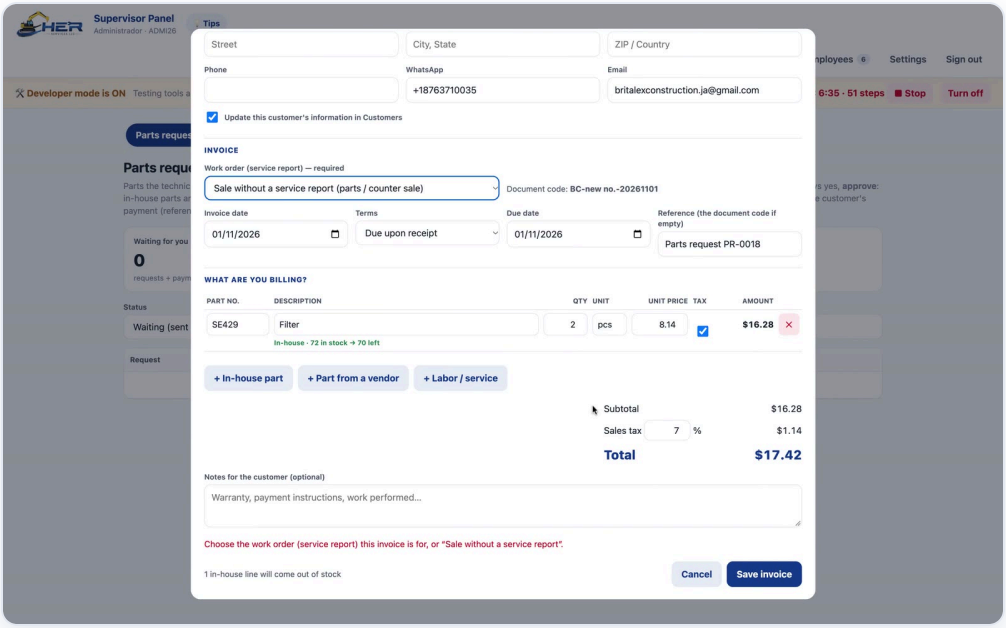

When the customer accepts, click **Customer said yes — approve & reserve parts**. In-house parts are reserved for **2 hours**; use **+2 h** **+8 h** **+1 day** to extend.

Approved request with reserved parts and history.

Create the invoice

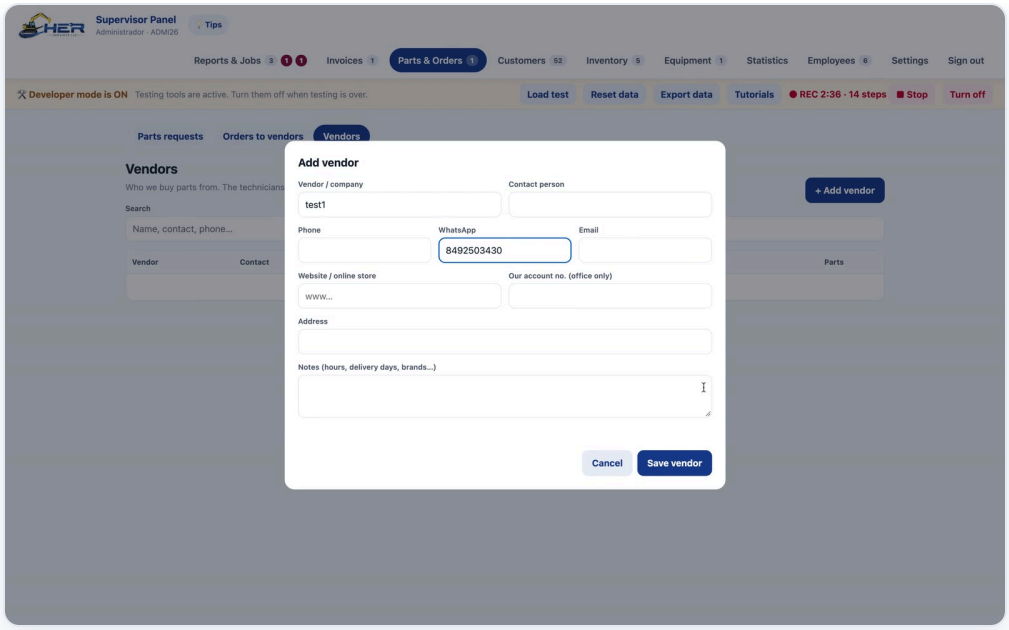

1. Click **Create invoice**. Customer, parts and prices are filled in, and the **Reference** shows the parts request number.
2. In **Work order**, choose the service report these parts belong to, or **Sale without a service report** if they were sold on their own.
3. Click **Save invoice**.

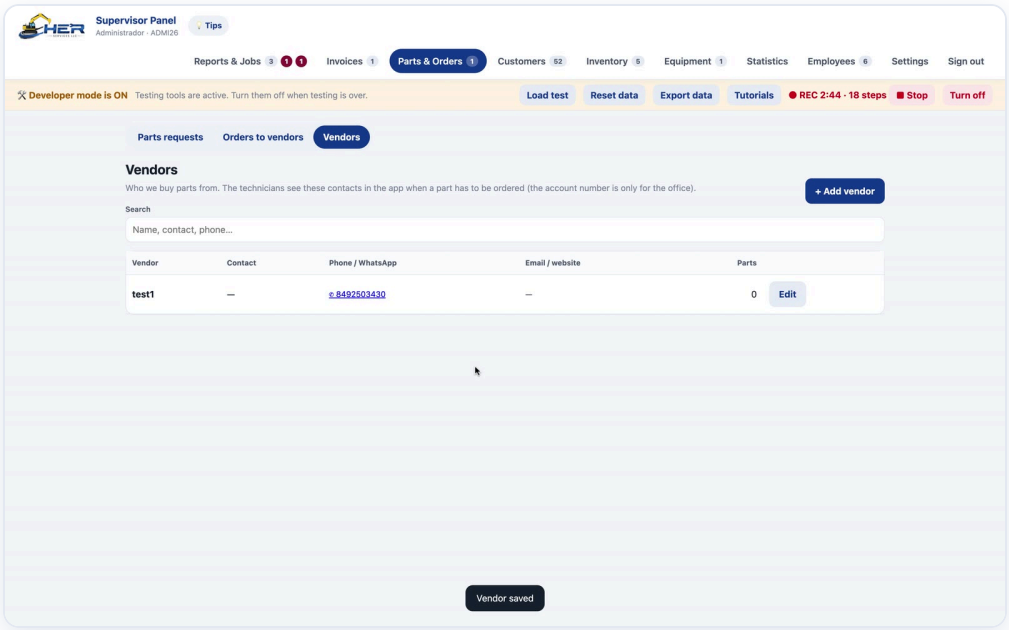

An invoice created from a parts request.

Orders to vendors and Vendors

Orders to vendors lists the parts you need to buy from a supplier. To save a supplier, open **Vendors** and click **+ Add vendor**: enter the company, contact person, phone, WhatsApp, email, website, **your account number** with them, address and notes, then click **Save vendor**.

Adding a vendor.

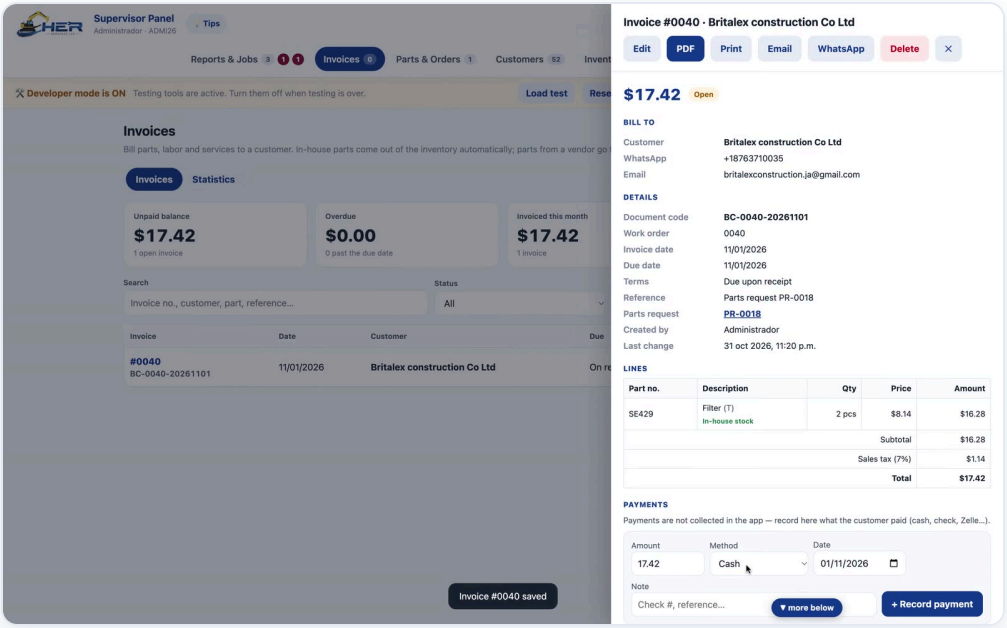

The vendor list. Click Edit to update a vendor.

Stock: parts leave the stock only when the invoice is made.

07 Manage invoices

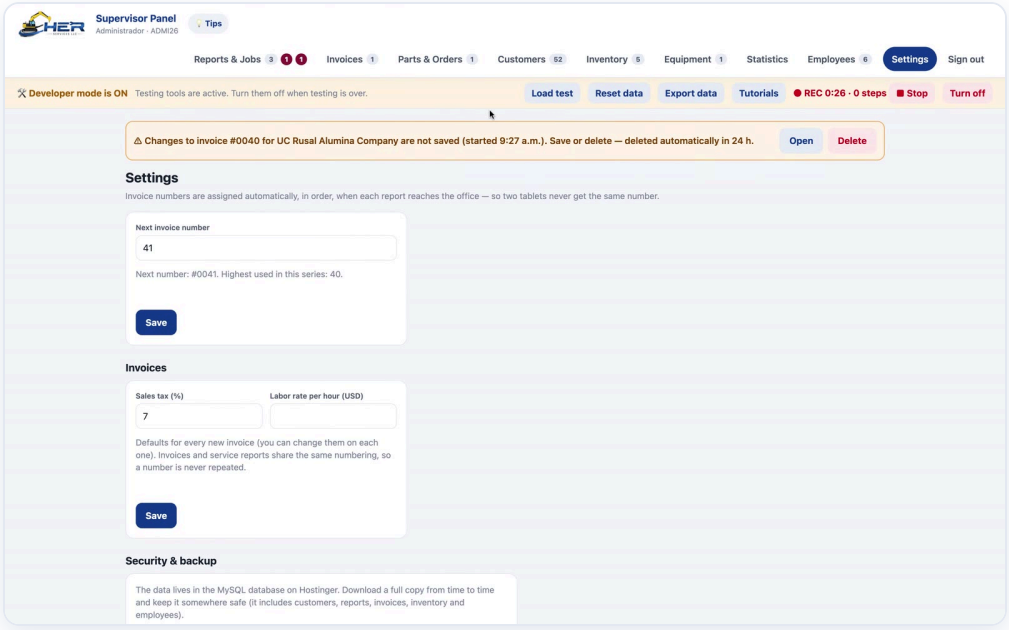

Invoices → click an invoice

An open invoice: Edit, PDF, Print, Email, WhatsApp and Delete at the top.

Unsaved changes

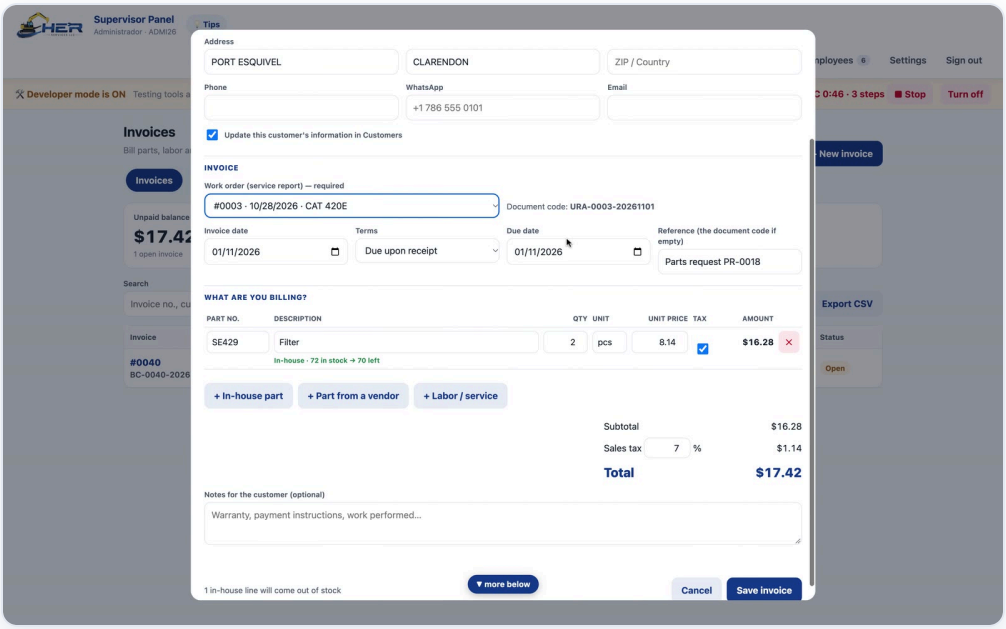

If you leave changes to an invoice without saving, a yellow banner appears at the top of every page. Click **Open** to go back to it, or **Delete** to discard the changes.

Banner for unsaved changes to an invoice.

Edit an invoice

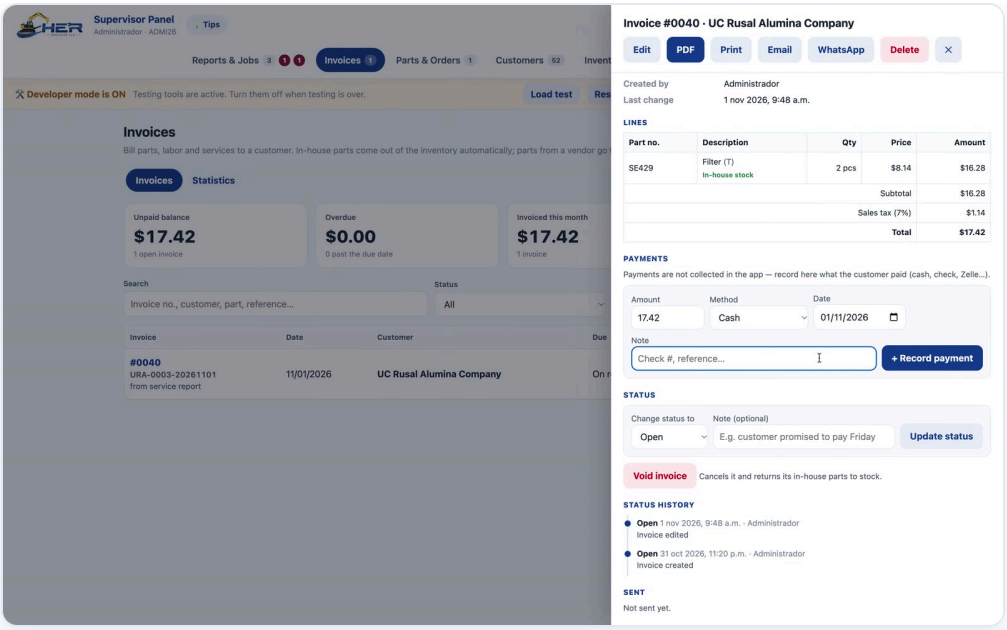

1. Open the invoice and click **Edit**.
2. In **Work order**, open the list and choose the service report this invoice belongs to. Each report shows its **number, date and machine**.
3. Click **Save invoice**.

Service report #0003 selected as the work order.

Record a payment

Under **Payments**, enter the **Amount**, **Method**, **Date** and a **Note** (check number, reference…), then click **+ Record payment**. The **Balance due** updates automatically.

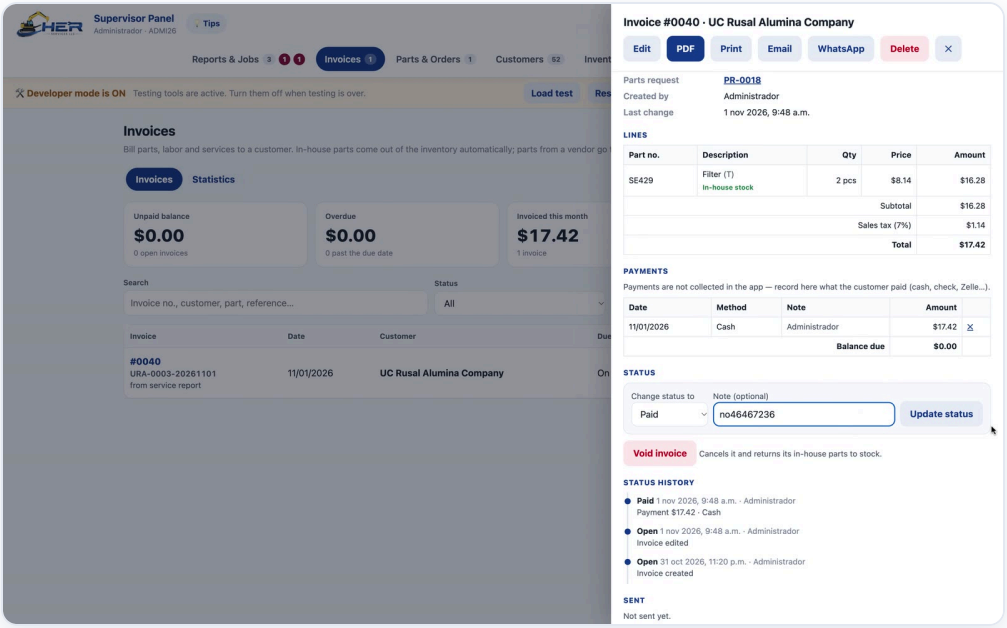

Recording a payment.

> **Important:** payments are not collected in the app. Here you only record what the customer paid (cash, check, Zelle...).

Change the status

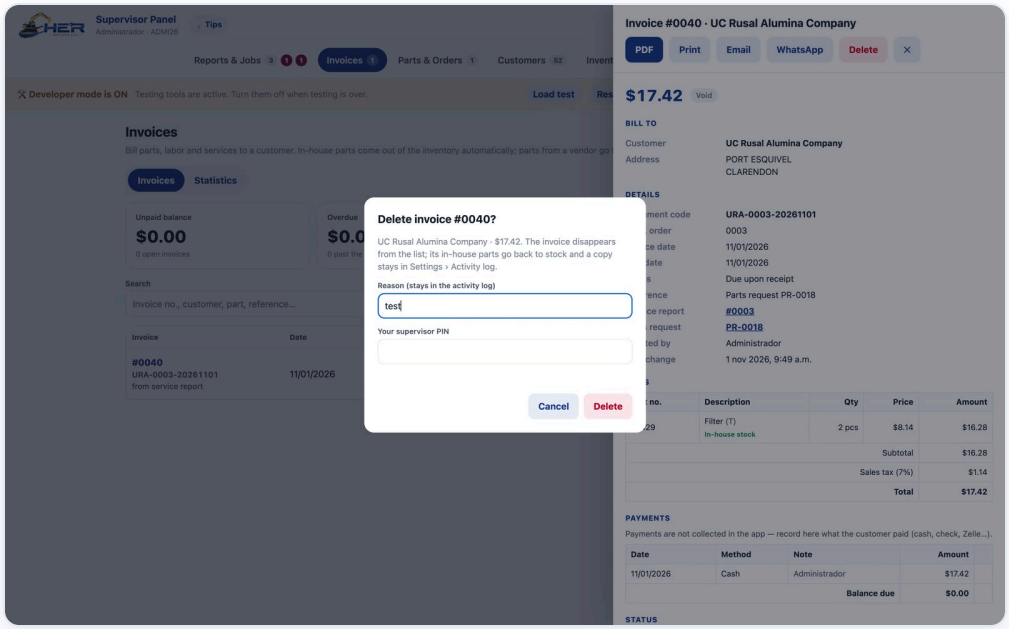

Under **Status**, choose a new status (for example *Paid*), add an optional note and click **Update status**. Every change is saved in the **Status history** with the date and the person who made it.

Updating the status and the status history.

Void or delete

- **Void invoice** cancels the invoice and returns its in-house parts to stock. The invoice stays in the list marked as **Void**.
- **Delete** removes the invoice completely. Write the **reason** and enter your **supervisor PIN**. A copy stays in **Settings → Activity log**.

Deleting an invoice requires a reason and your PIN.

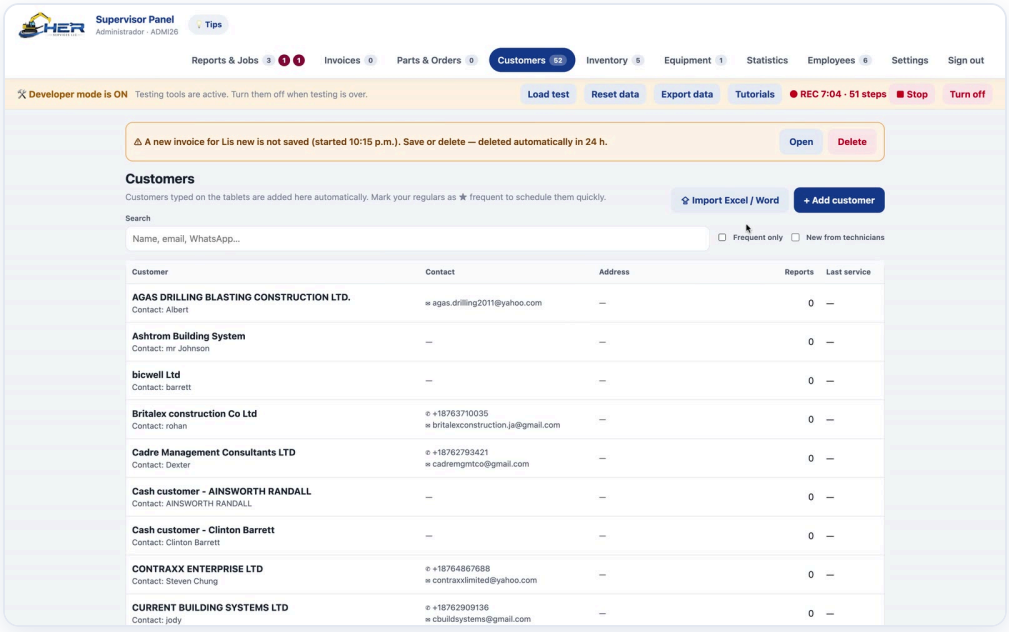

08 Customers

Customers

The list shows each customer's contacts, number of reports and last service. Customers typed on the tablets are added automatically.

Import a list

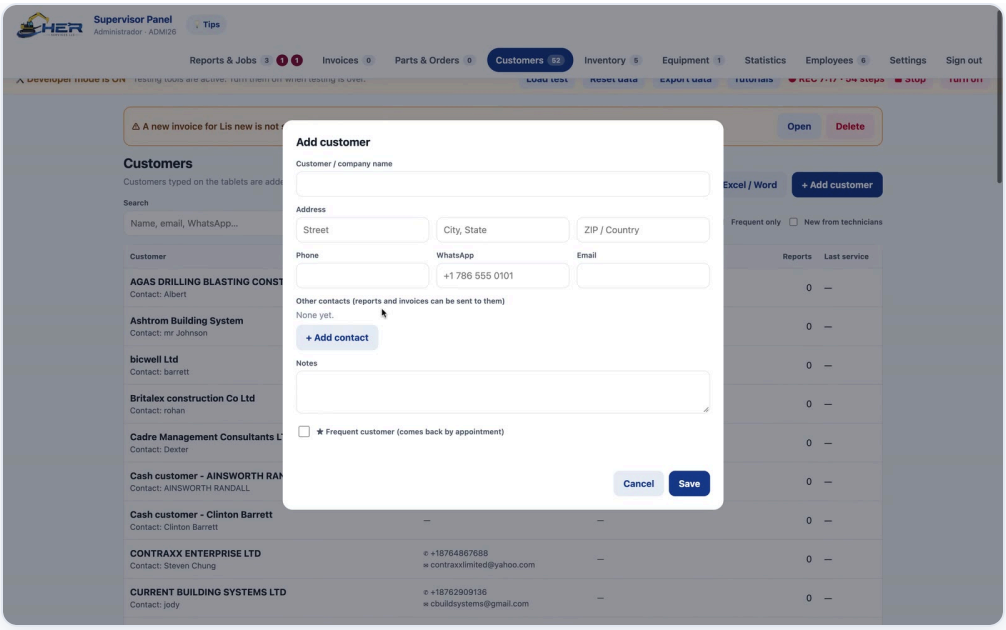

Click **Import Excel / Word** to load customers from Excel, CSV, Word, or a photo of a table. Click **Download template** to get the format. Duplicates are merged and existing customers are never overwritten.

Importing customers.

Add or edit a customer

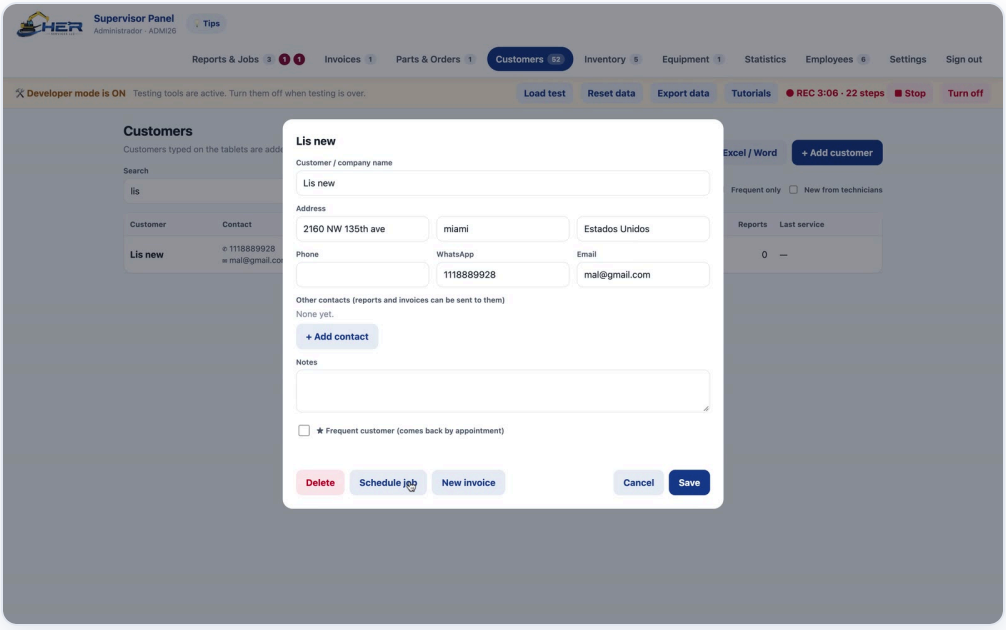

- **+ Add customer** creates a customer by hand. Add extra contacts (reports and invoices can be sent to them) and check **Frequent customer** for regulars.
- To edit, search the name and click it. Update the details and click **Save**.

The Add customer form.

Schedule or bill from the customer card

In the customer card, click **Schedule job** to open a new job with the customer's details already filled in, or **New invoice** to bill them right away.

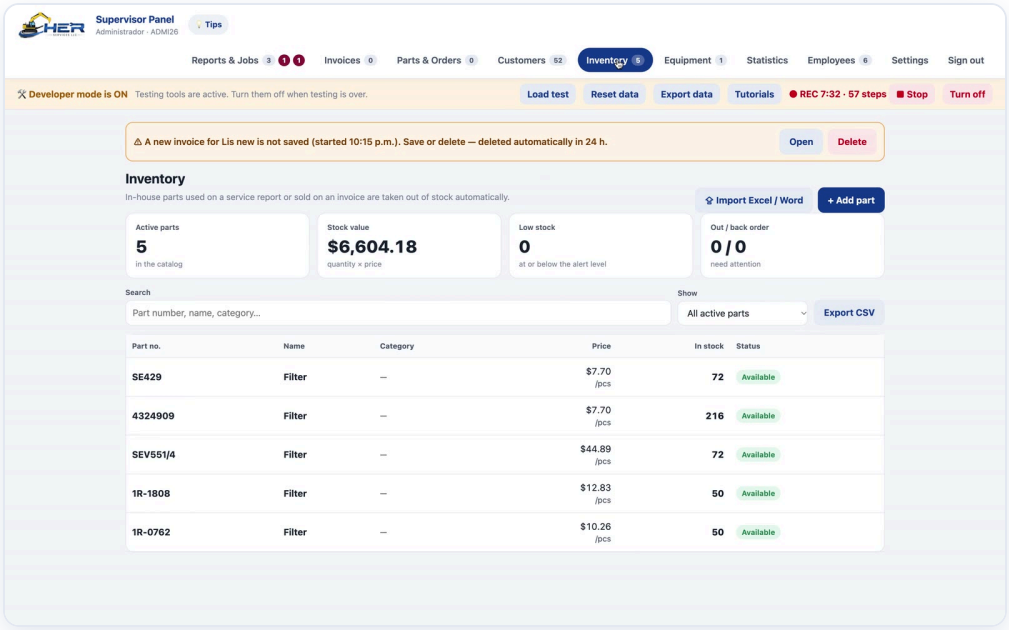

Customer card with Delete, Schedule job and New invoice.

09 Inventory & Equipment

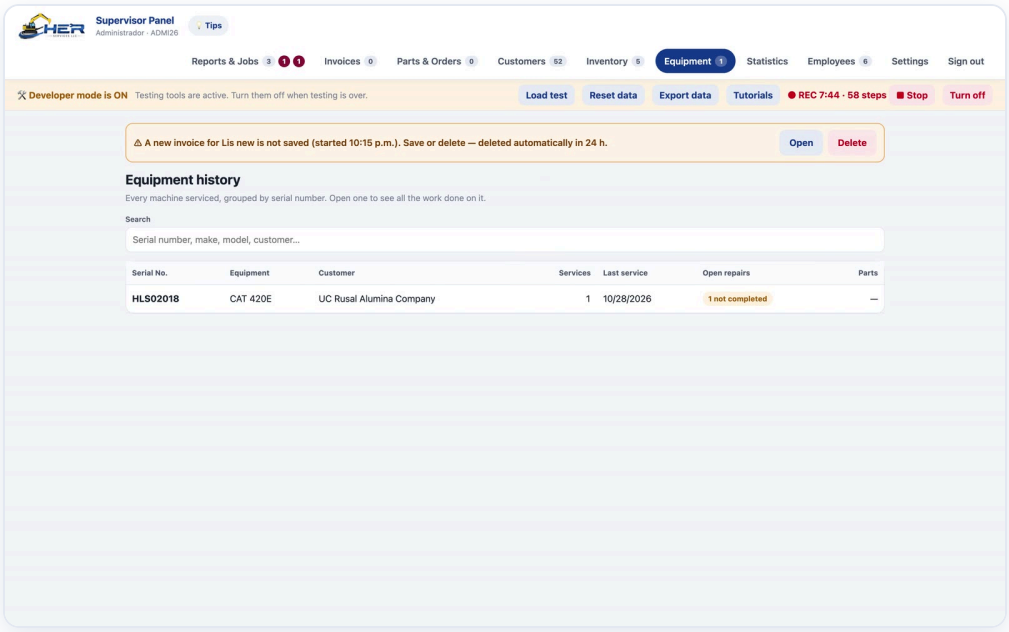

Inventory · Equipment

Inventory shows every part with its price, quantity in stock, status and the total stock value. Use **+ Add part** or **Import Excel / Word**, and **Export CSV** to download.

Inventory with stock value and low-stock counters.

Equipment lists every machine serviced, grouped by serial number. Open one to see all the work done on it.

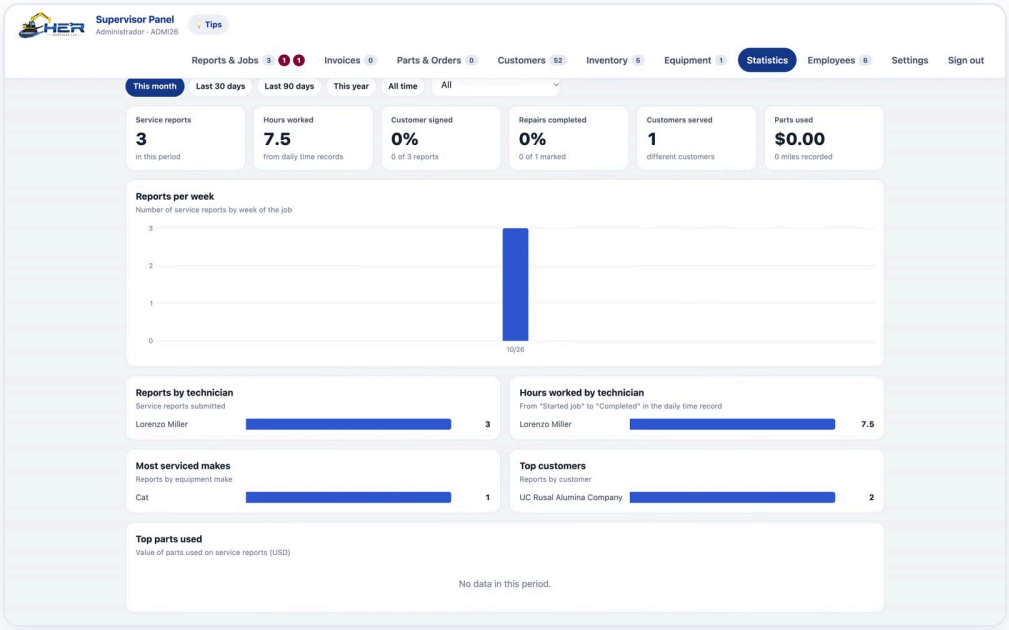

Equipment history by serial number.

10 Statistics

Statistics

Choose a period — **This month** **Last 30 days** **Last 90 days** **This year** **All time** — and, if you want, a **Technician**.

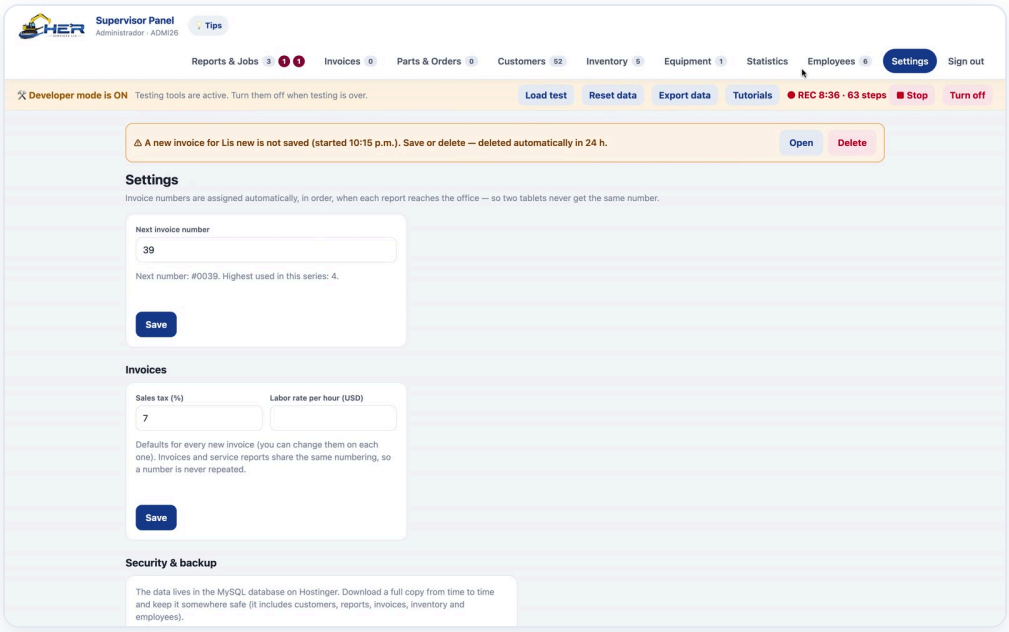

Statistics dashboard.

You will see service reports, hours worked, signed and completed reports, customers served, parts used, reports per week, top customers, most serviced makes and top parts.

11 Settings

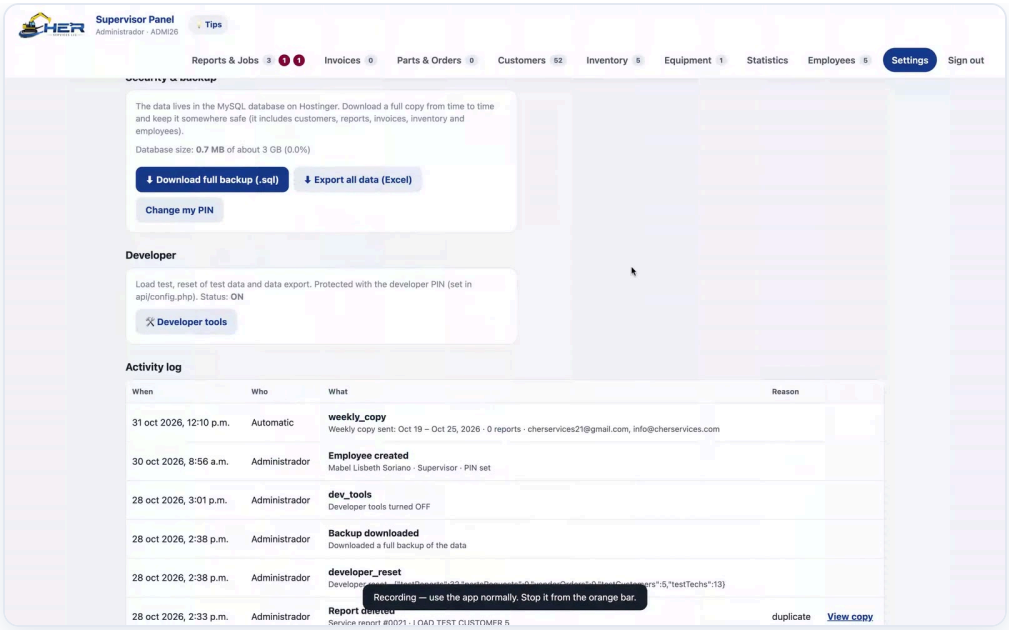

Settings

- **Next invoice number** — numbers are assigned automatically, in order, so two tablets never get the same number.
- **Invoices** — default **Sales tax (%)** and **Labor rate per hour (USD)** for every new invoice.

Invoice numbering and defaults.

- **Security & backup** — `Download full backup (.sql)` or `Export all data (Excel)`, and `Change my PIN`.
- **Activity log** — who did what, and when, including deleted reports and invoices.

Backup options and the activity log.

> ★ **Best practice:** download a full backup regularly and keep it somewhere safe.

Quick reference

The most common tasks at a glance

I want to…	Go to
Review a report from a technician	Reports & Jobs → Service reports → click the report number
Sign a finished job	Open the report → Signatures → Sign as supervisor → Accept signature
Add a technician	Employees → + Add employee
Schedule a visit	Jobs & appointments → + New job (or Customers → card → Schedule job)
Approve a cancel request	Jobs & appointments → highlighted job → Approve — cancel the job
Quote parts to a customer	Parts & Orders → request → Send quote to technician
Reserve parts after a "yes"	Parts & Orders → request → Customer said yes — approve & reserve parts
Bill a customer	Invoices → + New invoice (or Create invoice from a report / parts request)
Record a payment	Invoices → invoice → Payments → + Record payment
Mark an invoice as paid	Invoices → invoice → Status → Paid → Update status
Cancel an invoice	Invoices → invoice → Void invoice
Add a supplier	Parts & Orders → Vendors → + Add vendor
Back up all data	Settings → Security & backup → Download full backup

Deleting reports and invoices always asks for a reason and your supervisor PIN, and keeps a copy in the activity log.
